# INDEX TO VOL. LXXXVIII. (B)

Adrenalin and carbon dioxide, antagonistic action on heart (Patterson), 371.

Anthocyanins and anthocyanidins, production of.—Part II (Everest), 326.

Armstrong (H. E.) and Gosney (H. W.) Studies on Enzyme Action. XXII.—Lipase (IV) —The Correlation of Synthetic and Hydrolytic Activity, 176.

Arterial pressure in man, measurement of (Flack and others), 508, 516.

Back (M.), Cogan (K. M.), and Towers (A. E.) Functional Œdema in Frog's Muscle, 544.

Barcroft (J.) and Kato (T.) The Effect of Functional Activity upon the Metabolism, Blood-flow, and Exudation in Organs, 541.

Beard (E.) and Cramer (W.) Surface Tension and Ferment Action, 575.

Bose (J. C.) The Influence of Homodromous Electric Currents on Transmission of Excitation in Plant and Animal, 483.

Bottomley (W. B.) Some Accessory Factors in Plant Growth and Nutrition, 237.

Breathing and blood at high altitudes, changes in (FitzGerald), 248.

Bruce (Sir D.) and others. *Glossina brevipalpis* as a Carrier of Trypanosome Disease in Nyasaland, 20 ; —— Trypanosome Diseases of Domestic Animals in Nyasaland. III.—*Trypanosoma pecorum*.—Development in *Glossina morsitans*, 33 ; —— Trypanosomes found in Wild *Glossina morsitans* and Wild Game in the "Fly Belt" of the Upper Shiré Valley, 38 ; —— The Food of *Glossina morsitans*, 41 ; —— Infectivity of *Glossina morsitans* in Nyasaland during 1912 and 1913, 43 ; —— Trypanosome Diseases of Domestic Animals in Nyasaland. *Trypanosoma capræ* (Kleine). Part III.—Development in *Glossina morsitans*, 92 ; —— The Trypanosome causing Disease in Man in Nyasaland. The Liwonde Strain. Part I.—Morphology. Part II.—Susceptibility of Animals, 97 ; The Naturally Infected Dog Strain. Part I.—Morphology, 111 ; Part II.—Susceptibility of Animals, 130 ; Part III.—Development in *Glossina morsitans*, 213 ; Part IV.—Experiments in Immunity, 219 ; —— Morphology of Various Strains of the Trypanosome causing Disease in Man in Nyasaland : The Human Strain, VI to X, 190 ; —— The Trypanosome causing Disease in Man in Nyasaland. II.—The Wild-Game Strain. III.—The Wild *Glossina morsitans* Strain. Part II.—Susceptibility of Animals, 205.

Cardiac valves, mechanism of (Kent), 537.

Catalysts, study of oxidation by (Ewart), 284.

Cells, action of rays on growing (Joly), 262.

Cladocera, life-cycle of (Smith), 418.

Cogan (K. M.) See Back and others.

Compton (A.) Constancy of the Optimum Temperature of an Enzyme under Varying Concentrations of Substrate and of Enzyme, 258 ; The Influence of the Hydrogen Concentration upon the Optimum Temperature of a Ferment, 408.

Cramer (W.) Surface Tension as a Factor controlling Cell Metabolism, 584. See also Beard (E.) and Cramer.

Croonian Lecture (Wilson), 333.

Crustacea, growth and reproduction in (Smith), 418.

Cytological research and heredity (Wilson), 333.

Drury (A. N.) The Validity of the Microchemical Test for the Oxygen Place in Tissues, 166.

Enzyme, constancy of optimum temperature of (Compton), 258.
Enzyme action XXII, Lipase IV (Armstrong and Gosney), 176.
Everest (A. E.) The Production of Anthocyanins and Anthocyanidins, Part II, 326.
Ewart (A. J.) A Comparative Study of Oxidation by Catalysts of Organic and Inorganic Origin, 284.
Excitation in plant and animal, influence of electric currents on transmission of (Bose), 483.

Ferment action and surface tension (Beard and Cramer), 575.
Ferment, influence of hydrogen concentration upon optimum temperature of a (Compton), 408.
Fildes (P.) See McIntosh and Fildes.
FitzGerald (M. P.) Further Observations on the Changes in the Breathing and the Blood at Various High Altitudes, 248.
Flack (M.), Hill (L.), and McQueen (J.) The Measurement of Arterial Pressure in Man. —I. The Auditory Method, 508 ; II. A Schematic Investigation, 516.
Flagellate, observations on life-cycle of a new (Woodcock and Lapage), 353.

Gaskell (W. H.) Obituary Notice of, xxvii.
*Glossina morsitans*, trypanosomes found in (Bruce, etc.), 38 ; food of (Bruce, etc.), 41 ; infectivity of (Bruce, etc.), 43.
Goodey (T.) Investigations on Protozoa in Relation to the Factor Limiting Bacterial Activity in Soil, 437.
Gosney (H. W.) See Armstrong and Gosney.
Green (J. R.) Obituary Notice of, xxxvi.
*Gunda ulvæ*, osmotic pressure and the regeneration of (Lloyd), 1.
Günther (A. C. L. G.) Obituary Notice of, xi.

Hæmolysis, influence of salt concentration on (Topley), 396.
Halnan (E. T.) and Marshall (F. H. A.) On the Relation between the Thymus and the Generative Organs and the Influence of these upon Growth (with a Note by G. U. Yule), 68.
Hatta (S.) On the Mesodermic Origin and the Fate of the So-called Mesectoderm in Petromyzon, 457.
Heart, inclinations of electrical axis of human (Waller), 49 ; —— action of carbon dioxide and adrenalin on (Patterson), 371.
*Helkesimastix fæcicola*, a new flagellate (Woodcock and Lapage), 353.
Heredity, bearing of cytological research on (Wilson), 333.
Hill (L.) See Flack and others ; also Twort and Hill.
Holt (A.) The Colouring Matters in the Compound Ascidian *Diazona violacea*, Savigny, 227.

Joly (J.) A Theory of the Action of Rays on Growing Cells, 262.

Kato (T.) See Barcroft and Kato.
Kent (A. F. S.) On the Mechanism of the Cardiac Valves : a Preliminary Communication, 537.

Lapage (G.) See Woodcock and Lapage.
*Lepidostrobus Kentuckiensis*, formerly *L. Fischeri* (Scott), 435.
Lipase—Correlation of synthetic and hydrolytic activity (Armstrong and Gosney), 166.

Lister (A.) Obituary Notice of, i.
Lloyd (D. J.) The Influence of Osmotic Pressure upon the Regeneration of *Gunda ulvæ*, 1 ; —— The Osmotic Balance of Skeletal Muscle, 568.

McIntosh (J.) and Fildes (P.) A Comparative Study of Oxidation by Catalysts of Organic and Inorganic Origin, 320.
McQueen (J.) See Flack and others.
Marshall (F. H. A.) See Halnan and Marshall.
Metabolism, blood-flow and exudation, effect of functional activity on (Barcroft and Kato), 541.
Muscle, functional œdema in (Back and others), 544 ; —— osmotic balance of skeletal, (Lloyd), 568 ; —— vapour-pressure hypothesis of contraction of (Roaf), 139.
Myers (C. S.) The Influence of Timbre and Loudness on the Localisation of Sounds, 267.

Nerves, cranial, question of segmental value of certain (Nicholls), 563.
Nicholls (G. E.) On the Occurrence of an Intracranial Ganglion upon the Oculomotor Nerve in *Scyllium canicula*, etc., 553.

Obituary Notices :—
Gaskell, W. H., xxvii.
Green, J. R., xxxvi.
Günther, A. C. L. G., xi.
Lister, A., i.
Oculomotor nerve in *Scyllium*, intracranial ganglion upon (Nicholls), 553.
Œdema, functional, in frog's muscle (Back and others), 544.
Oxidation by catalysts, study of (Ewart), 284.
Oxygen place in tissues, the microchemical test for the (Drury), 166.

Patterson (S.W.) The Antagonistic Action of Carbon Dioxide and Adrenalin on the Heart, 371.
Petromyzon, so-called mesectoderm in (Hatta), 457.
Plant growth and nutrition, accessory factors in (Bottomley), 237.
Protozoa in relation to bacterial activity in soil (Goodey), 437.
Pulmonary ventilation, effect of depth of, on oxygen in venous blood (Twort and Hill), 548.

Roaf (H. E.) The Vapour-pressure Hypothesis of Contraction of Striated Muscle, 139.

Scott (D. H.) *Lepidostrobus kentuckiensis*, nomen nov., formerly *Lepidostrobus Fischeri*, Scott and Jeffrey : a Correction, 435.
*Scyllium canicula*, intracranial ganglion upon oculomotor nerve in (Nicholls), 553.
Smith (G.) The Life-Cycle of Cladocera, with Remarks on the Physiology of Growth and Reproduction in Crustacea, 418. See also Thornton and Smith.
Soil, protozoa and bacterial activity in (Goodey), 437.
Sounds, localisation of (Myers), 267.
Surface tension and ferment action (Beard and Cramer), 575 ; as factor in cell metabolism (Cramer), 584.

Thomson (D and J. G.) The Cultivation of Human Tumour Tissue *in vitro*.—Preliminary Note, 90.
Thornton (H. G.) and Smith (G.) On the Nutritive Conditions determining the Growth of certain Fresh-water and Soil Protista, 151.

Thymus and generative organs, relation between, and influence on growth (Halnan and Marshall), 68.
Tissue, variation in growth of mammalian, *in vitro* (Walton), 476.
Topley (W. W. C.) The Influence of Salt-Concentration on Hæmolysis, 396.
Towers (A. E.) See Back and others.
*Trypanosoma caprœ* (Kleine), development in *Glossina morsitans* (Bruce and others), 92.
Trypanosome causing disease in man in Nyasaland. Liwonde strain (Bruce and others), 97 ; —— naturally infected dog strain (Bruce and others), 111, 130.
Trypanosome disease, *Glossina brevipalpis* as carrier of (Bruce and others), 20.
Trypanosome diseases of domestic animals in Nyasaland. III.—*T. pecorum.*—Development in *Glossina morsitans* (Bruce and others), 33 ; —— *T. caprœ*, Part III.—Development in *Glossina morsitans* (Bruce and others), 92.
Trypanosomes in wild *Glossina morsitans* and wild game in fly belt of Upper Shiré (Bruce and others), 38.
Trypanosomes, question of syngamy in (Woodcock and Lapage), 353.
Tumour tissue, cultivation *in vitro* (Thomson), 90.
Twort (J. F.) and Hill (L.) The Effect of the Depth of Pulmonary Ventilation on the Oxygen in the Venous Blood of Man, 548.

Waller (A. D.) The Various Inclinations of the Electrical Axis of the Human Heart. Part Ia.—The Normal Heart : Effects of Respiration, 49.
Walton (A. J.) On the Variation in the Growth of Mammalian Tissue *in vitro* according to the Age of the Animal, 476.
Wilson (E. B.) The Bearing of Cytological Research on Heredity. (Croonian Lecture), 333.
Woodcock (H. M.) and Lapage (G.) Observations on the Life-Cycle of a New Flagellate, *Helkesimastix fæcicola*, n.g., n.sp. : together with Remarks on the Question of Syngamy in the Trypanosomes, 353.

Yule (G. U.) See Halnan and Marshall.

END OF THE EIGHTY-EIGHTH VOLUME (SERIES B.)

HARRISON AND SONS, Printers in Ordinary to His Majesty, St. Martin's Lane.
